

PROSPECTUS

# FØROYA LANDSSTÝRI

THE GOVERNMENT OF THE FAROE ISLANDS

FØROYA LANDSSTÝRI DKK 1,100,000,000 1.25 PER CENT

FIXED RATE NOTES

2 JUNE 2022 / 2 JUNE 2024

ISIN DK0030509393

## **IMPORTANT INFORMATION**

This Prospectus is published on 1 June 2022.

The Føroya Landsstýri (the "Issuer" or the "Government of the Faroe Islands") will issue DKK 1,100,000,000 1.25 per cent Fixed Rate Notes due 2 June 2024 (the "Notes"). The Notes will constitute direct, general and unconditional obligations of the Issuer.

Application has been filed with Nasdaq Iceland hf. for the trading and official listing of the Notes on the main market of Nasdaq Iceland hf. Acceptance of the Notes for the trading and official listing on the main market of Nasdaq Iceland hf. is expected to have effect from 3 June 2022.

The Prospectus is expected to be passported to the Kingdom of Denmark on or about 1 June 2022. Following passporting of the Prospectus to the Kingdom of Denmark, application will be filed with Nasdaq Copenhagen A/S for the trading and official listing on the main market of Nasdaq Copenhagen A/S. Acceptance of the Notes for the trading and official listing on the main market of Nasdaq Copenhagen A/S is expected to have effect from 3 June 2022.

The Prospectus was prepared for the primary official listing and trading on the main market of Nasdaq Iceland hf. and the main market of Nasdaq Copenhagen A/S, respectively.

The Prospectus has been reviewed and approved by the Financial Supervisory Authority of the Central Bank of Iceland ("FSA") as competent authority under Regulation EU 2017/1129 (the "Prospectus Regulation") which has been implemented into Icelandic law with Act No. 14/2020 (the "Act on Prospectus for Public Offering or Admission to Trading on a Regulated Market"). The FSA only approves this Prospectus as meeting the standards of completeness, comprehensibility and consistency imposed by the Prospectus Regulation. Approval by the FSA should not be considered as an endorsement of the Issuer or of the quality of the Notes that is the subject of this Prospectus. Investors should make their own assessment as to the suitability of investing in the Notes.

This Prospectus has been prepared in English only. The Prospectus consists of three documents: Summary, Registration Document and Securities Note.

Investing in the Notes involves significant risks. The principal risk factors that may affect the ability of the Issuer to fulfil its obligations under the Notes are described under (i) Clause 1 of the Registration Document, entitled "Risk Factors"; and (ii) Clause 1 of the Securities Notes, entitled "Risk Factors".

The Notes may not be suitable for all investors. Each potential investor in the Notes must determine the suitability of the Notes as an appropriate investment in light of its own circumstances, experience and financial condition. In particular, each potential investor should:

- (a) have sufficient knowledge and experience to make a meaningful evaluation of the Notes, the merits and risks of investing in the Notes and the information contained or incorporated by reference in this Prospectus or any applicable supplement;

(b) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Notes and the impact the Notes will have on its overall investment portfolio;

(c) have sufficient financial resources and liquidity to bear all of the risks of an investment in the Notes;

(d) understand thoroughly the terms of the Notes and be familiar with the behaviour of any relevant indices and financial markets; and

(e) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

Unless otherwise explicitly stated, no information contained in this Prospectus has been audited or reviewed by the Issuer's auditors.

This Prospectus is available at the following locations: Nordea Danmark, Filial af Nordea Bank Abp, Finland, Grønlandsvej 10, DK-2300 Copenhagen S, Denmark (the "Arranger") and Landsbanki Føroya, Kvíggjartún 1, FO-160 Argir, Faroe Islands.

The Prospectus may also be obtained from the website: <https://www.landsbankin.fo/en-gb/liquidity-and-debt/debt/prospectus-for-current-loans>

*This Prospectus is a prospectus for the purposes of the Prospectus Regulation and for the purpose of giving information with regard to the Issuer and the Notes which, according to the particular nature of the Issuer and the Notes, is necessary to enable investors to make an informed assessment of the assets and liabilities, financial position, profit and losses and prospects of the Issuer.*

*This Prospectus has been prepared on the basis that any offer of Notes in any Member State of the European Economic Area will be made pursuant to an exemption under the Prospectus Regulation, from the requirement to publish a prospectus for offers of Notes. Accordingly, any person making or intending to make an offer in that Relevant Member State of the Notes may only do so in circumstances in which no obligation arises for the Issuer or the Arranger to publish a prospectus pursuant to Article 1 (4) of the Prospectus regulation or supplement a prospectus pursuant to Article 23 of the Prospectus Regulation, in each case, in relation to such offer. Neither the Issuer nor the Arranger have authorised, nor do they authorise, the making of any offer of Notes in circumstances in which an obligation arises for the Issuer or the Arranger to publish or supplement a prospectus for such offer.*

No person has been authorised by the Issuer or the Arranger to give any information or to make any representation other than those contained in this Prospectus in connection with the issue or sale of the Notes and, if given or made, such information or representation must not be relied upon as having been authorised by the Issuer or the Arranger.

No representation or warranty is made or implied by the Arranger or any of its respective affiliates, and neither the Arranger nor any of its affiliates (other than the Issuer) makes any representation or warranty or accepts any responsibility, as to the accuracy or completeness of the information contained in this Prospectus. Neither the delivery of this Prospectus nor any sale made in connection herewith shall, under any circumstances, create any implication that there has been no change in the affairs of the Issuer since the date hereof or the date upon which this Prospectus has been most recently amended or supplemented or that there has been no adverse change in the financial position of the Issuer since the date hereof or the date upon which this Prospectus has been most recently amended or supplemented or that any other information supplied in connection with the Prospectus is correct as of any time subsequent to the date on which it is supplied or, if different, the date indicated in the document containing the same.

This Prospectus may not be used for the purpose of an offer or solicitation by anyone in any jurisdiction in which such offer or solicitation is not authorised or to any person to whom it is unlawful to make such an offer or solicitation.

The distribution of this Prospectus and the offering or sale of the Notes in certain jurisdictions may be restricted by law. Persons into whose possession this Prospectus comes are required by the Issuer and the Arranger to inform themselves about and to observe any such restriction. The Notes have not been and will not be registered under the U.S. Securities Act of 1933, as amended (the "U.S. Securities Act") or with any securities regulatory authority of any state or other jurisdiction of the United States and the Notes may be subject to U.S. tax law requirements. Subject to certain exceptions, Notes may not be offered, sold or delivered within the United States or to, or for the account or benefit of, U.S. persons (as defined in the U.S. Internal Revenue Code of 1980 and the regulations thereunder), except pursuant to an exemption from, or in a transaction not subject to the registration requirements of, the U.S. Securities Act and applicable state or local securities laws.

Solely for the purposes of the manufacturer's product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for

the Notes is eligible counterparties, professional clients and retail clients, each as defined in Directive 2014/65/EU (as amended, "MiFID II"); and (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate and (iii) the following channels for distribution of the Notes to retail clients are appropriate - investment advice, portfolio management, and non-advised sales or execution with appropriateness test, subject to the distributor's (as defined below) suitability and appropriateness obligations under MiFID II, as applicable. Any person subsequently offering, selling or recommending the Notes (a "distributor") should take into consideration the target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the target market assessment) and determining appropriate distribution channels, subject to the distributor's suitability and appropriateness obligations under MiFID II, as applicable.

This Prospectus does not constitute an offer of, or an invitation by or on behalf of the Issuer, the Arranger or any of them to subscribe for or purchase, any Notes.

This Prospectus may include forward-looking statements. Forward-looking statements are not statements of historical fact but rather reflect the Issuer's current expectations, estimates and predictions about future developments in the Issuer's economy and public finances and events. Words such as "anticipates," "estimates," "expects," "projects," "intends," "plans," "believes" and words or terms of similar substance used in connection with any discussion of future developments of the Issuer's economy and public finances identify forward-looking statements.

Forward-looking statements involve risks and uncertainties. There are multiple factors that could cause actual developments of the Issuer's economy and public finances to differ materially from those contemplated by the forward-looking statements. Most of these factors are difficult to predict accurately and are generally beyond the Issuer's control. Prospective investors should consider the uncertainty and risk resulting from such uncertainty in connection with any forward-looking statements that the Issuer makes.

**SUMMARY**

## Introduction and warnings

*This summary contains all the sections required by the Prospectus Regulation to be included in a summary for this type of securities and issuer. This summary should be read as an introduction to the Prospectus. Any decision to invest in the securities should be based on consideration of the Prospectus as a whole by the investor.*

*An investor investing in the securities could lose all or part of the invested capital. Where a claim relating to the information contained in the Prospectus is brought before a court, the plaintiff investor might, under applicable law, have to bear the costs of translating the Prospectus before legal proceedings are initiated. The Issuer assumes civil liability in respect of this summary including translation thereof only if it is misleading, inaccurate or inconsistent, when read together with the other parts of the Prospectus, or where it does not provide, when read together with the other parts of the Prospectus, key information in order to aid investors when considering whether to invest in the securities.*

# Key Information on the Issuer

## **Who is the Issuer of the securities?**

### *General*

The name of the Issuer is the Government of the Faroe Islands and it is domiciled in the Faroe Islands. The Issuer is operating under Faroese law. The Issuer's Legal entity identifier (LEI) is 213800P8SSDDDNK9Z83.

### *Principal activities*

The Faroe Islands are a self-governing country within the Kingdom of Denmark which also comprises Greenland. The Faroe Islands are not a member of the European Union.

The Faroe Islands hold a foreign currency rating of Aa2 with stable outlook assigned by Moody's Investors Service.

## **What is the key financial information regarding the Issuer?**

The strong economic growth over the last decade has caused a strong growth in employment. The employment has increased from 25,815 at year end 2017 to 28,077 at year end 2021, which is an increase of 8.8%. The unemployment rate was 1.0 in January 2022.

The Statistics Faroe Islands and the Economic Council have estimated a growth in nominal GDP of 8.2% in 2021, while the average increase in the consumer price index was 2.7% from 2020 to 2021, accordingly the real economic growth can be estimated to be approx. 5.5% in 2021.

The central government accounts show a surplus of DKK 246 million in 2021, whereas the Budget Act for 2022 states a surplus of DKK 38 million. In the appropriation framework presented to the Faroes Parliament on 1 April 2022 the government expects the budget result to show a deficit in both 2022 and 2023. The government aims at limiting the upcoming deficits in its planned appropriations for the years ahead by improving the budget result by DKK 30 million annually until 2027 which is expected to result in a deficit of approx. DKK 90 million in 2022 and a balanced budget by the year of 2025.

The Statistics Faroe Islands and the Economic Council estimate an increase in nominal GDP of 3.3% in 2022 and 2.4% in 2023.

1) Including liquidity for appropriations transferred from previous years.

2) Including DKK 500 million to Danish Government. The loan is written off in June 2018.

### **What are the key risks that are specific to the Issuer?**

The Issuer's ability to fulfil its obligations under the Notes is highly dependent on the condition of the Faroese economy. The Issuer is exposed to a number of risks in respect of the conditions of the Faroese economy, including with regards to:

- *Production* – Fishery, fish farming and related industries are of such importance that their influence determines the overall performance of the Faroese economy. Demersal and pelagic fisheries are dependent on the stocks of various species. Access to fishery outside Faroese waters may have a material adverse impact on the fishery and related industries. Profitability in fish farming depends to a large degree on export prices and the industry's ability to avoid the fish disease plague. The export of the fish farming industry currently constitutes approximately half of total fish exports in 2021. The *export to Russia* accounts for approx. 25% of the Faroese export products. The geopolitical conflict related to the war in Ukraine will subject to sanctions etc. most likely have an effect on the Faroese export to Russia, but the Faroese exporting companies are expected to establish new markets relatively fast with a short temporary fall in prices, as the foreign demand for fish is stable. The Faroese Ministry of Finance expects the effects from the geopolitical conflict on the economy to be relatively small and are currently expected to mostly take place in 2022 and to a lesser extent in 2023.
- The Faroe Islands also *trade fishing rights with Russia*. The Faroese fishing fleet trade pelagic species quota in Faroese water with cod quota in the Russian parts of the Barents Sea. However, if the trade agreement is terminated due to sanctions, the Faroe Islands is estimated to have about the same value in fishing quotas of pelagic species in Faroese waters. A termination of the trade agreement with Russia may on a short term basis have negative economic impact on the shipowners with quotas in the Barents Sea.
- *Unemployment* – The unemployment rate has been decreasing since the 2011, from 7.0% in 2011, to 1.0% in January 2022.
- *The governmental sector* – The central government accounts show a surplus of DKK 246 million in 2021. In the appropriation framework presented to the Faroes Parliament on 1 April 2022, the government expects the budget result to show a deficit in both 2022 and 2023. The government aims at limiting the upcoming deficits in its planned appropriations for the years ahead by improving the budget result by DKK 30 million annually until 2027 which is expected to result in a balanced budget by the year of 2025.
- *The political environment* - Any changes in the political environment of the Faroe Islands or in the relationship between the Faroe Islands and Denmark may affect the Faroese economy. Precipitous political actions taken either by the Faroe Islands or the Kingdom of Denmark could have significant impact on the Faroese economy.
- *Macroeconomy* – The Faroe Islands are sensitive to macroeconomic and geopolitical conditions which can have an adverse effect on the Faroese economy.

## Key Information on the Securities

### **What are the main features of the securities?**

The Notes constitute direct and unsecured obligations of the Government of the Faroe Islands and constitute unsubordinated loan indebtedness ranking *pari passu* with all other loan indebtedness of the Government of the Faroe Islands. The Notes of each series will rank equally with each other, without any preference among themselves.

The currency of the Notes is Danish kroner ("DKK") and each note will be issued with the denomination of DKK 1,000. The total principal amount of the Notes to be issued on the Issue Date, 2 June 2022 is DKK 1,100,000,000.

The Notes will be issued and registered as dematerialised securities, in book-entry form with the Danish central securities depository, Euronext Securities (VP SECURITIES A/S) ("Euronext Securities"), on the Issue Date. The Notes are open for further issues without a fixed maximum amount. Future issues will be made at market price. The Notes will be closed for further issues from 2 May 2024.

Nordea Danmark, Filial af Nordea Bank Abp, Finland, Grønjordsvej 10, DK-2300 Copenhagen S, Denmark, will act as Account Holding Institute (in Danish: Kontoførende Institut) in relation to Euronext Securities.

The Notes are issued as negotiable securities and are freely transferable after having been registered into the respective book-entry account.

The Notes have been issued at a price of 99.992 per cent., and will bear interest from and including 2 June 2022 to but excluding 2 June 2024. The Notes will pay a fixed rate interest of 1.25 per cent. per annum payable annually in arrears on 2 June in each year commencing on 2 June 2023 and ending on 2 June 2024. The Notes will be redeemed at their Principal Amount (par) on 2 June 2024 (Maturity Date). The Notes are not redeemable by the Issuer prior to the Maturity Date, and only with the exception of an event of default, the noteholders may not demand redemption of the Notes prior to the Maturity Date.

The International Securities Identification Number (ISIN) for the Notes is DK0030509393.

The INET code for the Notes is FO-LB 240602.

Nasdaq Copenhagen A/S short name for the Notes is FOROYA LAN JUN24.

### **Where will the securities be traded?**

Application has been filed with Nasdaq Iceland hf and Nasdaq Copenhagen A/S. for the trading and official listing of the Notes on the main markets of Nasdaq Iceland hf and Nasdaq Copenhagen A/S.

### **What are the key risks that are specific to the securities?**

- The Issuer's liability to make payments according to the terms and conditions in this Prospectus constitutes direct and unsecured obligations of the Government of the Faroe Islands and constitutes unsubordinated loan indebtedness ranking *pari passu* with all other loan indebtedness of the Government of the Faroe Islands.
- The conditions of the Notes do not include a limitation on the Issuer for issuing additional debt or granting of security, and do not limit the Issuer's ability to effect

significant transactions that may have a material adverse effect on the Notes and the Noteholders.

- The Notes are not redeemable by the Issuer prior to the Maturity Date, and only with the exception of an event of default, the noteholders may not demand redemption of the Notes prior to the Maturity Date.
- The market of the Notes issued by the Issuer is influenced by economic and market conditions and, to varying degrees, interest rates, currency exchange rates and inflation rates.
- The Notes may have no established trading market when issued, and one may never develop. If a market does develop, it may not be liquid. Therefore, investors may not be able to sell their Notes easily or at prices that will provide them with a yield comparable to similar investments that have a developed secondary market.
- Each potential investor in the Notes must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

have sufficient knowledge and experience to make a meaningful evaluation of the Notes, the merits and risks of investing in the Notes and the information contained or incorporated by reference in this Prospectus or any applicable supplement to this Prospectus; (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Notes and the impact such investment will have on its overall investment portfolio; (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the Notes, including where the currency for principal or interest payments, i.e. DKK, is different from the currency in which such potential investor's financial activities are principally denominated; (iv) understand thoroughly the terms of the Notes and be familiar with the behaviour of any relevant indices and financial markets; and (v) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

- There can be no assurance that an active trading market for the Notes will be developed and maintained, which may affect the trading price and the liquidity of the Notes. The Issuer has not made any arrangement with any persons or companies to ensure the liquidity of the Notes.
- The terms and conditions of the Notes are based on Danish law in effect on the date of this Prospectus. No assurance can be given that as to the impact of any possible judicial decisions or changes to Danish and Faroese law after the date of this Prospectus.
- The Issuer shall not be liable for any loss incurred by the noteholders as a consequence of statutory provisions, measures adopted by any governmental or other authority actual or imminent war, insurrections, civil commotion, terrorism, sabotage or Acts of God. Nor shall the Issuer be liable for any loss caused by strikes, lockouts, boycotts or blockades, whether or not the Issuer itself is a party to the dispute, and notwithstanding that the dispute may affect only part of the functions of the Issuer. Nor shall the Issuer be liable for any loss arising from any overdue payment caused by the above events.

# Key Information on the Offer of Securities to the Public and Admission to Trading on a Regulated Market

## ***Under which conditions and timetable can I invest in this security?***

Nordea Danmark, Filial af Nordea Bank Abp, Finland has arranged for the Notes to be purchased by a group of institutional investors. The issue of the Notes has not been underwritten with a firm commitment.

Application has been filed with Nasdaq Iceland hf. for the trading and official listing of the Notes on the main market of Nasdaq Iceland hf. Acceptance of the Notes for the trading and official listing on the main market of Nasdaq Iceland hf. is expected to have effect from 3 June 2022. The Prospectus is expected to be passported to the Kingdom of Denmark on or about 1 June 2022. Following passporting of the Prospectus to the Kingdom of Denmark, application will be filed with Nasdaq Copenhagen A/S for the trading and official listing on the main market of Nasdaq Copenhagen A/S. Acceptance of the Notes for the trading and official listing on the main market of Nasdaq Copenhagen A/S is expected to have effect from 3 June 2022.

In connection with the Listing, the Issuer expects to pay approximately a total of DKK 2,362,295 in fees and expenses. No fees or other payments will be charged to the investor by the Issuer. Account operators may charge fees in accordance with their price lists for the subscription and opening and maintaining of the book-entry account or other custody system and for custody of the Notes.

Any investor intending to acquire any Notes from a bank, financial intermediary or other entity (other than the Arranger in its capacity as such) will do so in accordance with any terms and other arrangements in place between the seller and such investor, including as to price, allocations and settlement arrangements. The Issuer will not be a party to such arrangements with investors, and, accordingly, investors must obtain such information from the relevant seller.

## ***Why is this Prospectus being produced?***

The proceeds from the issue of the Notes will be used for the financing of the redemption of Føroya Landsstýri DKK 1,300,000,000 0% due 2 June 2022 with ISIN code DKDK0030466990.

## ***Material interests***

Save for any fees payable to the Arranger, so far as the Issuer is aware, no person involved in the issue of the Notes has an interest material to the offer.

The Arranger and other entities within the same group and/or their affiliates may have performed and may in the future perform investment or other banking services for the Issuer in the ordinary course of business for which they may have received and may continue to receive customary fees and commissions. The Arranger and their respective affiliates may hold long or short positions, and may trade or otherwise effect transactions, for their own account or the accounts of their customers, in debt securities of the Issuer.

# 1. Risk factors

Prospective investors should read this Prospectus carefully. The Prospectus consists of three documents: Summary, Registration Document and the Securities Note all of which have been dated 1 June 2022. Investing in the Notes involves risks factors that may affect the Issuer's ability to fulfil its obligations under the Notes to the investors, and which the potential investor should take into consideration prior to deciding to make an investment in the Notes.

This Registration Document which forms part of the Prospectus has been reviewed and approved by the Financial Supervisory Authority of the Central Bank of Iceland ("FSA") as competent authority under Regulation EU 2017/1129 (the "Prospectus Regulation") which has been implemented into Icelandic law with Act No. 14/2020 (the "Act on Prospectus for Public Offering or Admission to Trading on a Regulated Market"). The FSA only approves this Registration Document as meeting the standards of completeness, comprehensibility and consistency imposed by the Prospectus Regulation. Approval by the FSA should not be considered as an endorsement of the Issuer or of the quality of the Notes that is the subject of the Prospectus. Investors should make their own assessment as to the suitability of investing in the Notes.

The Issuer believes that the factors described below represent the principal risks inherent in investing in the Notes, but the inability of the Issuer to pay interest, principal or other amounts on or in connection with the Notes may occur for other reasons which may not be considered significant risks by the Issuer based on information currently available to it or which it may not currently be able to anticipate.

Taking into account the negative impact on the Issuer and the probability of their occurrence, the risk factors as set out below have been, in the assessment of the Issuer, been ordered so that the most material risks are set out first.

Most of these factors are contingencies which may or may not occur and the Issuer is not in a position to express a view on the likelihood of any such contingency occurring.

There may be other risks that a prospective investor should consider that are relevant to the investor's own particular circumstances or generally.

Prospective investors should carefully consider, among other things, the factors described in the sections below before purchasing the Notes. In addition, for risk specifically associated with the Notes, investors are advised to consider the section "Risk factors" in the Securities Note.

## 1.1 The Faroese economy

The Issuer's ability to fulfil its obligations under the Notes is highly dependent on the conditions of the Faroese economy.

### 1.1.1 Production

The Statistics Faroe Islands together with the Economic Council has estimated GDP in current prices to increase by 8.2% in 2021<sup>1</sup>, and it is therefore likely that the real economic growth was approx. 5.5% in 2021, as the average increase in the consumer price index was 2.7% for the same period.

---

<sup>1</sup> Source: Statistics Faroe Islands and the Economic Council

Faroese households were cautious to increase spending for several years after the financial crisis in 2008, but wage and salary expenditures have increased 41% from 2014 to 2021. However, the salaries increased only by 2% in 2020 because of Covid-19, but increased by 3.6% in 2021. Imports of consumption products have increased steadily throughout the years 2014 to 2021, from DKK 1,287 million in 2014 to 1,951 million in 2021 (52%).

Fishery, fish farming and related industries are of such importance that their influence determines the overall performance of the Faroese economy. The dependence on resource-based industries is evident in the export figures, of which fish products account for more than 90% of the export value of goods. The Faroese fishing fleet is very oil dependent, hence major increases in oil prices also constitute a risk factor for the Faroese economy.

### 1.1.2 Employment

The Faroe Islands' nominal GDP has increased 21% from 2016 to 2021. This has led to a substantial increase in the employment. The employment has increased from 24,655 in January 2017 to 27,605 in January 2022, which is an increase of 12%. The unemployment rate has been steadily declining during the past 10 years from 7.0% in 2011 to 1.0% in January 2022.

In the 10 years period from 2004-2013 there was an average net emigration of 260 persons per year, mainly caused by the Faroese labour market not being able to absorb all jobseekers, but also caused by people having left the Faroe Islands for educational purposes. However, from 2014 to 2021, there has been a net immigration to the Faroe Islands of approximately 440 persons per year. With a natural increase of 250 persons per year, the number of inhabitants increased by almost 700 persons annually in the years 2014 to 2021. The population has increased from 48,153 in January 2014 to 53,676 in January 2022, which is an increase of 11.5% over the last 8 years.

Two important factors have led to the increase of the population. The first is the improvement in the employment possibilities as companies have been hiring more employees. The other factor is the increasing number of people reaching the retirement age and thereby providing an opening for younger people to enter the labour market.

### 1.1.3 Fishery, fish farming and fishing industry

Mainly five industries contribute to the Faroese exports: (a) the demersal fisheries in Faroese waters; (b) the pelagic fisheries in Faroese waters and in fishery zones of other countries; (c) factory trawlers fishing cod in the Barents Sea; (d) other fisheries and (e) the fish farming industry.

Demersal fisheries in Faroese waters have been experiencing considerable difficulties for the last 17 years. The cod and haddock stocks have been historically low. Catches during the years 2004-2021 have therefore been considerably lower than the long-term average catches. Demersal stocks are fragile as a large proportion of the stocks are harvested every year. Cod catches in Faroese waters during 2021 were 5,500 tonnes. Long term average catches of cod have been 28-30,000 tonnes before the year of 2004. Haddock catches were 6,500 tonnes in 2021, whereas long term average catches have been 15-20,000 tonnes. Saithe catches were 15,500 tonnes in 2021, whereas average catches have been 40-45,000 tonnes.

All three main demersal fish stocks are currently small. Fishing cod and haddock has already been unprofitable for many years, and the number of vessels has been dwindling. The fleet fishing saithe has now also got into very low profitability.

As catches of demersal species have been small since 2006, production in the fish processing industry has been at a very low level. Some fish factories import fish from Norway, Iceland and Greenland to keep employment steady.

Cod fisheries in the Russian part of the Barents Sea have increased from 12,000 tonnes in 2012 to around 30,000 tonnes in 2021. These fishing rights are granted in exchange for Russian ships being allowed to fish pelagic fish in Faroese waters. If the trade agreement with Russia is terminated due to sanctions imposed by the Faroe Islands against Russia, it may on a short term basis have negative economic impact for the shipowners with quotas in the Barents Sea. If the shipowners with demersal quotas in the Barents Sea are given pelagic quotas of comparable value in Faroese waters instead, then the shipowners may need to use other types of vessels to fish pelagic species in Faroese waters instead of fishing demersal species in the Barents Sea.

The value of the Russian pelagic quotas in Faroese waters is of comparable value as the Faroese demersal quotas in the Barents Sea. It is therefore not likely that a termination of the fishery agreement with Russia will have significant long term negative economic consequences.

On 12 March 2014, the Faroe Islands came to an agreement with the EU and Norway on fishing rights for catching mackerel which lasted for five years and was extended by two more years in 2019. Since 2021 there has not been any agreement between the coastal countries (Norway, UK, EU, Iceland, Greenland and the Faroe Islands) on fishing mackerel. Therefore, in both 2021 and 2022 the Coastal states have set their own mackerel quota. As the Faroese fleet is not allowed to fish mackerel in British waters, where the quality of the mackerel is higher and the fishing is more effective, both Norway and the Faroe Islands have set their own mackerel quota that is quite higher. In 2021 the pelagic ships spent longer time catching mackerel than when fishing in British waters, and in 2021 the total export value of mackerel was higher than in 2020.

Pelagic fisheries have had very good years during 2009-2021, and the export value of the pelagic fleet has quadrupled in these years. The increased catches are mainly due to higher quotas but also due to more flexibility because of increased fishing rights agreed with EU and Norway. The export value of herring catches has increased from DKK 190 million in 2009 to DKK 720 million in 2021. Total export of pelagic species was DKK 400 million in 2009 and has increased to DKK 1,900 million in 2021.

Fish farming has made a large contribution to economic growth in the recent years and the export value has increased from DKK 2.9 billion in 2014 to DKK 4.5 billion in 2021.

Other factors that affect the resource industries are fish prices and oil prices. The Faroese fishing fleet is very oil dependent, hence significant increases of oil prices also constitutes a risk factor for the Faroese economy.

During the outbreak of Covid-19, the export prices of most fish species decreased, but prices have slowly been recovering. For example the cod prices have been quite stable around DKK 40 in 2019-2021, but have increased to over DKK 50 in first quarter 2022.

The price of herring was in the first quarter of 2022 about DKK 7.50, increased from about DKK 6 during the Covid-19. The mackerel price fell from DKK 11.50 in 2019 to DKK 10.50 in 2020. The mackerel price was DKK 12 in the first quarter of 2022. Likewise, salmon prices decreased during the Covid-19 pandemic. For example the price for fresh salmon for Faroese salmon exporters decreased from DKK 53 2019 to DKK 46 í 2020, and has now recovered to DKK 63 in first quarter 2022.

#### 1.1.4 The financial markets

At the end of 2021, the total lending from Faroese financial institutions was DKK 16.5 billion. One of the reasons that lending has not grown as fast as the economy these past 10 years, is that several of the large companies in the fishing industry and fish farming have had large profits, and thus being less dependent on banks for undertaking investments. Also, as a consequence of the financial crises in 2008 the Faroese financial institutions have increased their capital in order to meet the capital requirements.

The market for the Notes issued by the Government of the Faroe Islands is influenced by economic and market conditions and, to varying degrees, interest rates, currency exchange rates and inflation rates. There can be no assurance that events on the Faroe Islands, in Denmark, Europe or elsewhere will not cause market volatility and that such market volatility will not adversely affect the trading price of the Notes.

#### 1.1.5 The governmental sector

The expected budget deficit in 2020 was expected to be DKK 1.1 billion, however, the budget deficit for 2020 turned out to be smaller, DKK 286 million. The central government accounts show a surplus of DKK 246 million in 2021.

In the appropriation framework presented to the Faroes Parliament on 1 April 2022, the government expects the budget result to show a deficit in both 2022 and 2023. The deficit in 2022 is expected to become around DKK 100-150 million due to investments that were postponed in 2021 and will take place in 2022. The government therefore aims at limiting the upcoming deficits in its planned appropriations for the years ahead by improving the budget result by DKK 30 million annually until 2027 which is expected to result in a deficit of around DKK 90 million in 2022 and a balanced budget by the year of 2025. The expected deficit 2022 to 2024 amounts to around DKK 250 million, and the debt is expected to increase with the same amount. From 2025 the government expects surplus on the Budget. In 2023 the appropriation framework states expenses of appr. DKK 6,600 million in total with operational costs of around DKK 6,050 million and investment costs of DKK 550 million. The income is expected to be DKK 6,480 million in 2023. The deficits on the government accounts could have significant impact on the Faroese economy and the Issuer's credit ratings and its ability to repay existing debt and obtain new financing.

#### 1.1.6 The political environment

##### *Relationship with Denmark*

Any changes in the political environment of the Faroe Islands or in the relationship between the Faroe Islands and Denmark may also affect the Faroese economy. Precipitous political actions taken either by the Faroe Islands or the Kingdom of Denmark could have significant impact on the Faroese economy and the Issuer's ability to pay

interest, principal or other amounts payable by the Issuer in relation with the Notes may occur for other reasons.

### *Sanctions against Russia*

The Faroe Islands Government has announced, that the Faroe Islands will implement the same restrictive measures as the Western world will implement against Russia as a consequence of the invasion of Ukraine. As the Faroe Islands did not implement any sanctions against Russia in 2014 in relation to the Russian invasion of the Crimea, it was necessary that parliament was provided the legal basis, so the Minister of Foreign Affairs can issue an executive order of what sanctions should be implemented against Russia. Accordingly the Law on Restrictive Measures was adopted on 5 May 2022.

The Faroese Ministry of Foreign Affairs expect that it will take three weeks after the adoption of the Law on Restrictive Measures to prepare the specific list of sanctions, that will be imposed against Russia.

The Faroe Islands have decided to do as Norway. Norway uses the same list of sanctions as EU, but exempt fishery.

Fishery and food transport are the main areas of cooperation between Faroe Islands and Russia. It is therefore not expected that the sanctions will have a substantial impact on the economic relations between Faroe Islands and Russia. It should be noted, that most of the export to Russia have already been diverted to other markets.

In case that the Faroese Government wants to implement sanctions that include fisheries and food transport, it will be necessary to convene the Faroese parliament to make this decision. The Law on Restrictive Measures states that: "implementation of actions that affect fishery agreements with other countries, or that restrict export of fish and other food cannot be implemented without legal basis from the Faroese Parliament."

Although no sanctions have been implemented, the Faroese exporters have already stopped export of the main export products to Russia. Total export to Russian has decreased from DKK 217 million in March 2021 to DKK 74 million in March 2022. This is a decrease of 66%.

Salmon export has decreased from 62 million in March 2021 to zero in March 2022 and pelagic fish products have decreased from DKK 46 million in March 2021 to DKK 17 million in 2022.

The exports that would have been sent to Russia have been diverted to other European countries.

## 2. Persons responsible

### 2.1 Statement from the Issuer

We, on behalf of the Government of the Faroe Islands, declare, as those responsible for the Registration Document that, having taken all reasonable care to ensure that such is the case, the information contained in the Prospectus is, to the best of our knowledge, in accordance with the facts and contains no omission likely to affect its import.

Information on the websites of the Issuer does not form part of the Prospectus unless that information is incorporated by reference into the Prospectus.

#### 3.3 Recent developments

There have been no recent events, which may have a material effect to the Issuer's solvency, other than described in this Registration Document, hereunder as described in section 1 above and below in sections 3 and 4.

### 3.4 Economy

The Faroe Islands is a modern, developed society with a standard of living comparable to other Nordic countries, with a GDP per capita that is on level with that in Denmark. The disposable national income per capita, which also includes the Danish state grant and salaries from Faroese employees working abroad, has for the last few years been on a level just above the level in Denmark.<sup>2</sup> It should be taken into consideration that the economy is not yet as diversified as in other highly developed countries, which causes the level of GDP per capita in the Faroe Islands to fluctuate more than in more diversified economies.

According to preliminary national accounts from Statistics Faroe Islands and the Economic Council, the nominal GDP increased by 8.2% in 2021<sup>3</sup>. The average increase in the consumer price index was 2.7% in 2021. Imports of consumption items have increased by 52% from 2014 to 2021, which indicates an increase in consumption in general.

In 2020 GDP fell by 2.8% in current prices due to the outbreak of Covid-19 which among other things yielded temporary price falls hitting fisheries and aquaculture companies resulting in lower export values in general in 2020. Furthermore, the pandemic caused the budget result turn into a deficit due to lower than usual personal income taxes and company taxes along with increased expenses in the health care sector and expenses to help packages. However, the domestic demand did not decrease as much as previously expected as the Faroese households spent more money in the Faroes than usual due to a strong consumer confidence and to the fact that travelling was limited which resulted in higher-than-expected VAT incomes in 2020 and stimulated the domestic trade- and service sector. Hence, along with export prices strengthening as the pandemic weakened, the economy experienced a fast recovery in 2021.

#### Economic Growth

**Table 1**

	<b>2017</b>	<b>2018</b>	<b>2019</b>	<b>2020</b>	<b>2021*</b>

Source: Statistics Faroe Islands

An economy with high dependence on fish products and exports is bound to be vulnerable to the changes in catches, fish stocks, fish prices and exchange rates. These often cyclical and unforeseen changes are volatile and have left their mark on the economic history of the islands. Export income can fluctuate significantly from one year to the next, and these fluctuations spread quickly throughout the economy.

It should also be taken into account that the fishing fleet consists of three main segments and several smaller segments that have business cycles that are only partly correlated, which reduces the volatility of the Faroese economy.

The Faroese fishing fleet is very oil dependent, hence significant increases of oil prices also constitutes a risk factor for the Faroese economy.

The fish farming industry has a different business cycle than the fisheries, as salmon prices do not always fluctuate with prices of fish caught at sea. Salmon prices have increased significantly over the last 10 years, and the exports have increased to a level that has made the Faroese economy less dependent on fishery as its' sole export industry.

The total fish exports have increased from DKK 3.7 billion in 2009 up to DKK 9.3 billion in 2021, an increase of approx. 150%. Total exports of products were DKK 10 billion in 2021. The large increase in exports has led to a large economic growth throughout the last decade.

The composition of the Faroese fish export has changed significantly over the past ten years.

The geopolitical conflict related to the war between Russia and Ukraine will subject to sanctions etc. affect the export to Russia, which counts for 25% of the export of products. The Faroese salmon exporting companies have stopped all export to Russia, but as demand is high and prices are good, there will be no negative effects of diverting exports to new markets. The export companies of the pelagic species will also so find new markets for their products, most likely with a short temporary fall in prices. In general the foreign demand for fish is stable.

The Faroese wet fish fleet is mainly fishing demersal species as cod, haddock and saithe in the Faroese fisheries zone, while a different part of the fleet consisting of factory trawlers are fishing cod in the Barents Sea. The traditional cod, haddock and saithe fisheries in Faroese and foreign waters were around DKK 1.1 billion in export value for several years until 2016, but increased to DKK 1.6 billion in 2019. However they have decreased to DKK 1.3 bn in 2021.

The export value of catches by the pelagic fleet (fishing herring, mackerel and blue whiting) has increased from around DKK 400 million in 2009 to DKK 1.9 billion in 2021. Of the total export value, the Faroese mackerel export to Russia was DKK 520 million in 2021. The international mackerel market is worldwide and the exporters do not expect that prices will be significantly affected by selling mackerel to other markets. Faroese herring export to Russia was DKK 470 million in 2021. The international herring market is concentrated on the Nordic countries, Russia, Germany and Poland. If the export is diverted from Russia to other countries it is expected that it is necessary to lower the prices to get access to this limited market. Herring can also be used to for fish oil products, which is expected to limit the decrease in the market price for herring.

Another significant change is that the fish farming industry has expanded, and that the export value of salmon consequently has increased from DKK 1.2 billion in 2009 to DKK 4.5 billion in 2021.

The strong economic growth over the latest decade is also evident in the wage expenditures. The wage expenditure has increased from DKK 7.5 billion in 2014 to DKK 10.6 billion in 2021, i.e. 41%.

The catches of the demersal fleet in Faroese waters have been on a low level for about 15 years or more. The numbers of employees in the fishing industry in total (both demersal and pelagic fleet) has decreased from around 3,000 in the 80'ies and 90'ies to around 1,100 today, and in the industry processing fish, the number of employees has likewise decreased from around 3,000 in the 80'ies to around 1,200 today (January 2022).

The pelagic fisheries have increased more than the decrease in the catches of demersal species, but as pelagic fisheries are very capital intensive, there has been a significant loss of employment in fisheries. Although employment in fisheries has decreased, the salaries in the fishing industries have increased from DKK 800 million to DKK 1.0 billion in the last five years, mainly due to the new jobs in the pelagic fisheries are relatively well paid.

A considerable number of Faroese sailors have been working in the Danish merchant fleet and in fishing vessels in Greenland since the 1960's. In recent years there has been a significant change in the number of Faroese workers which are now working in the supply service sector in the Norwegian oil industry, and that there are also many electricians working in the land-based oil industry mainly in construction of new plants.

Wages and salaries earned by Faroese employees working abroad have been on a constant level of DKK 1.0 billion from 2016 to 2020.

As a consequence of the strong growth in the Faroese economy, the total employment has increased significantly over the last years. In 2014 the total number of employees was 23,531 but in 2021 it has increased to 27,459; an increase of 17%.

The average unemployment rate was 3.8 in 2014. It has since then been reduced and was 1.0 in January 2022. Table 4 below shows the development of employees in the various business sectors for the years 2016-2021.

**Employees by business sector 2017-2021<sup>(1)</sup>**

### 3.4.1 INDUSTRIES

#### ***Fishery and the fishing industry***

The fishing fleet consists of three main segments and some smaller segments, who all have their own business cycle. Firstly, there is the wetfish fleet which is mainly fishing in Faroese waters. Secondly, there is a pelagic fleet which is fishing in Faroese waters as well as in fishery zones of other countries mainly in Norwegian and EU fishery zones. Thirdly, there is a fleet of big factory trawlers fishing cod in the Barents Sea. Among the smaller fleets there are some prawn trawlers that are fishing in international waters off the Canadian coast as well as in Svalbard and in the Barents Sea and a small fleet of small trawlers fishing flatfish and monk (anglerfish) near the coast of the Faroe Islands.

Since the 1950s, the total yearly Faroese wet fish catch has been around 100,000 tonnes, and since the mid-1970s, most years the catch has been more than 100,000 tonnes (mean value 112,000 tonnes, standard deviation 20,000 tonnes). The most

important wet fish species in recent years have been saithe, cod, haddock and greater silver smelt. The catch of these species is done mainly by smaller fishing boats, long-line vessels and pair trawlers.

The pelagic fishery arose in the mid-1960s and has increased since then. Since 1995 the most important pelagic species have been blue whiting, herring, capelin and mackerel. These species are caught mainly by high capacity pelagic trawlers and purse seiners. Other species fished by Faroese ships are prawns and shellfish.

The catches in Faroese waters of demersal fish were around 88,000 tonnes around year 2000 but has decreased to 53,000 tonnes in 2021.

Faroese ships also fish cod in foreign waters, of which the Barents Sea is the most important as Faroese ships fish around 20,000 tonnes there. Most of the cod fished in foreign waters is caught by big filleting trawlers. If the trade agreement with Russia is terminated due to sanctions imposed by the Faroe Islands against Russia, it may on a short term basis have negative economic impact on the shipowners with quotas in the Barents Sea. If the shipowners with demersal quotas in the Barents Sea are given pelagic quotas of comparable value in Faroese waters instead, then the shipowners may need to use other types of vessels to fish pelagic species in Faroese waters instead of fishing demersal species in the Barents Sea.

The value of the Russian pelagic quotas in Faroese waters is of comparable value as the Faroese demersal quotas in the Barents Sea. It is therefore not likely that a termination of the fishery agreement with Russia will have significant long term negative economic consequences.

On 12 March 2014, the Faroe Islands came to an agreement with the EU and Norway on fishing rights for catching mackerel. In 2009 the Faroese catch of mackerel was around 15,000 tonnes and in 2014 it was ten folded to around 150,000 tonnes which approximately was the size of the Faroese quota of mackerel in 2021 as well. The 2014 agreement with EU and Norway lasted for five years and was extended by two more years in 2019. Since 2021 there has not been any agreement between the coastal countries (Norway, UK, EU, Iceland, Greenland and the Faroe Islands) on fishing mackerel. Hence in both 2021 and 2022 the coastal countries have set their own mackerel quota. The quality of the mackerel is higher in British waters, and the fishing is more effective, and since the Faroese fleet is not allowed to fish mackerel in British waters due to the lack of an agreement, both Norway and the Faroe Islands have set their own mackerel quota quite higher than recommended by ICES (the Faroese quota was set around 40% higher in 2021). In 2021 the pelagic ships spent longer time catching mackerel than when fishing in British waters, and in 2021 the total export value of mackerel was higher than in 2020. There is also yet no agreement between the coastal countries for the other two species (herring and blue whiting).

The number of employees in the fisheries in total was approximately 3,000 in the 1980's but has declined steadily until it stabilised at around 1,400 in the years 2016-2020. However, the number of employees in the fishing industry has decreased 1,100 (January 2022) mainly due to the low catches of cod, haddock and saithe in Faroese waters.

### ***On-land fish industry***

After the economic crisis in 1992, the on-land fish industry went through a restructuring process, and the number of plants was reduced to fewer, bigger or more specialised

plants. The filleting factories produce a range of fresh, iced and frozen products to the retail and food service markets.

The number of employees in the industry has decreased steadily for many years. As the resource base for production has been low in the last many years, the employment in fish factories on land has stagnated on a level of 1,200 employees in January 2022.

The processing capacity for pelagic species has been increased significantly the past ten years. The first factory was built in Kollafjørður, and its capacity has been increased subsequently. Processing plants for pelagic fish since then have been built in the town of Tvøroyri in 2012 and in Fuglafjørður in 2014.

### ***Aquaculture***

Farming of salmon started in the early 1980s and has ever since emerged to become the largest export industry of the Faroese economy.

Approximately 88,000 tonnes were harvested in 2020, 116,000 tonnes in 2021 and the harvest in 2022 is expected to be 109,000 tonnes<sup>4</sup>. The export value of Faroese farmed fish was approximately DKK 4.5 billion in 2021. DKK 4.5 billion corresponds to 49% of the total Faroese fishery exports in 2021. The average export prices of Norwegian farmed salmon have increased since 2012 when the price was NOK 28 per kg. The average forward prices for the rest of 2022 are around NOK 70 per kg and around NOK 65 per kg in 2023<sup>5</sup>.

The number of employees in the fish farming industry has increased from 863 in January 2014 to 1,377 in January 2022.

### ***Construction***

Construction activities have increased steadily over the last years. Employment in the construction sector has consequently increased from 1,388 in 2014 to 2,295 employees in January 2022. Several large public construction projects are currently ongoing, e.g. the sub-sea tunnel to Sandoy, which has an estimated cost around DKK 1.1 billion which according to the plan will open for traffic in the summer of 2023. Construction has started on another two tunnels in Borðoy with an estimated cost around DKK 520 million. Drilling started in 2021 and expected completion is in 2024. Because of the relatively high construction activity in the Faroes a substantial number of foreign construction workers are now employed by Faroese companies (almost 10% of the workers in the construction sector were foreigners in January 2014 and 16% in January 2022).

### ***Transportation***

#### *Internal*

The transport infrastructure in the Faroe Islands is good. Road connections now link all villages on each island and also between some of the islands.

---

<sup>4</sup> Source: Website: industry.fo, Lars Daniel Garshol, Kontali Analyse.

<sup>5</sup> Source: FishPool - The Norwegian marketplace for financial salmon contracts, website: fishpool.eu

In December 2002, the first sub-sea tunnel in the Faroe Islands was opened between Vágur and Streymoy. This is the first partially user-financed investment of its kind in the Faroe Islands. The construction of this tunnel increased the percentage of the Faroese population being connected by road transport from 69% to 75%. A second sub-sea tunnel between Borðoy and Eysturoy opened in May 2006. The construction of this tunnel made it possible for 86% of the total population to reach each other by road transport.

A third sub-sea tunnel from Eysturoy to Streymoy opened in December 2020. The tunnel shortens the traveling distance between Torshavn and most parts of Eysturoy by 30 to 50 km.

The fourth sub-sea tunnel Sandoyartunnilin is expected to open for traffic in 2023. Approx. 1,300 inhabitants (additional 3% of the total population) will be connected to the other islands by constructing this sub-sea tunnel.

Ferries and helicopter services are available to the islands that are not directly linked to the road system, and bus service is the most common form of transport for all other areas. As of 1 January 2022, there were 27,451 registered private cars, equivalent to 511 cars per 1,000 inhabitants.

### *External*

Atlantic Airways, the national airline carrier of the Faroe Islands, SAS and Widerø are currently the operators offering routes to and from the Faroe Islands. Depending on the season, there are five to eight daily flights to Denmark (Copenhagen, Aalborg and Billund). There are also flights each week to Iceland, Norway and the UK depending on the season. During the summer season there are flights to destinations around the Mediterranean Sea and to the Canary Islands. In 2019, 419,021 passengers travelled through Vágur airport, whereas the number of passengers was 176,493 in 2020 (a reduction of 57.6%) due to the Covid-19 pandemic. The pandemic also affected the first half of 2021, but in the second half of 2021 the tourism started to recover quickly, and the number of passengers increased by one third but was nevertheless 43.6% below the record high level in 2019. However, the expectations are high for the tourism in 2022.

The ferry Norröna (a combined cruise/cargo ship that can carry roughly 1,500 passengers and 800 cars) offers weekly service to Denmark and Iceland. 53,856 passengers travelled to the Faroe Islands by sea in 2019, whereas the number of passengers did decrease to 25,787 in 2020 because of the Covid-19 pandemic. In 2021 the number of passengers was around 40% lower than the 2019 (pre-Covid-19) level.

Icelandic and Faroese freight companies provide cargo carriage to and from the Faroe Islands. The most important routes are to Denmark, United Kingdom, Norway and Sweden.

### **Tourism**

Tourism is not a major industry in the Faroe Islands, but for many years, efforts have been made to develop the tourist industry in order to diversify the Faroese economy. The pre-Covid (2019) value of export from tourism is estimated to be 6.4% of the total export with 715 full-time workers in the tourist industry (in 2019)<sup>6</sup>. The outbreak of

---

<sup>6</sup> visitfaroeislands.com, annual report 2019.

Covid-19 highly affected the tourist industry in the Faroes in 2020 and in the first half of 2021, but in the second half of 2021 tourism quickly recovered. During 2020 two new hotels were built and a third hotel was renovated meaning that the total capacity of hotels has increased but in 2022 the number of tourists visiting the Faroe Islands is expected to exceed the pre-Covid (2019) level.

## ***Oil***

On 22 December 1992, the Danish Government agreed to transfer the rights to mineral resources in the subsoil of the Faroe Islands to the Government of the Faroe Islands. The initial oil exploration phase started in 1994 and since then, a number of firms have been exploring the subsoil.

So far, the explorations have discovered no commercial findings, but they have showed the presence of an active hydrocarbon system in Faroese subsurface.

## ***The financial market***

Financial affairs (except insurance companies and mortgage-credit institutions) are under Danish State authority and under the supervision of the Danish Financial Supervisory Authority (Finanstilsynet).

Four banks – Betri Banki P/F (former Eik Banki P/F), P/F BankNordik, Norðoya Sparikassi and Suðuroyar Sparikassi – serve the financial market in the Faroe Islands.

Lending from Faroese financial institutions was at the end of 2021 DKK 16.5 billion, which is 72% of GDP for 2021. The main reason that lending has been stagnating the past 10 years, is that several of the large companies in the fishing industry and fish farming have had large profits, and therefore have been less dependent on banks for undertaking investments. Also, as a consequence of the financial crises in 2008 the Faroese financial institutions have increased their capital in order to meet the stronger capital requirements to financial institutions.

The law affords the same conditions for Faroese financial institutions as for Danish financial institutions relative to the Danish Central Bank. This legislation thus enables the Faroese banks to participate in international capital markets.

Betri Banki P/F had a pre-tax profit of DKK 157 million in 2021. The bank's solvency ratio was by end of 2021, 30,7%.

P/F BankNordik had a pre-tax profit of DKK 237 million in 2021. The bank's CET 1 capital ratio was 23.8% and total capital ratio 27.5% the by the end of 2021.

Two smaller banks, Norðoya Sparikassi and Suðuroyar Sparikassi, complete the Faroese banking sector.

Norðoya Sparikassi had a pre-tax profit of DKK 21.4 million in 2021, and a solvency ratio of 25.4% at the end of 2021.

The smallest bank, Suðuroyar Sparikassi had a pre-tax profit of approx. DKK 2.6 million in 2021, and a solvency ratio of 22.2% at the end of 2021.

Various financing institutions other than banks, both private and public, hold about a 10% share of the total financial assets and play an important role in selected areas of the financial market.

In June 2008 a new insurance industry law passed by the Faroese Parliament came into force. In conformity with the insurance industry law from 1997, the monopoly was abolished, and a Faroese Insurance Supervisory Body was appointed. This allowed any Faroese company complying with statutory requirements to enter the insurance business on the condition that the company obtains permission from the Government of the Faroe Islands and the Faroese Insurance Supervisory Body.

The company, Trygd Ltd., and the old monopoly incumbent, Tryggingarfelagið Føroyar Ltd now Betri Trygging, (established in 1940), are currently the only non-life insurance companies active in the Faroese market. In the last few years, competition has increased in the life insurance market. The publicly owned company Føroya Lívstrygging (also a pension and life insurance company established in 1967) became a limited company in 2000. The part of the company, with the insurance policies signed before 1st January 2000, was privatised in 2016, and bought by trade unions and a company representing individual insurance customers. In February 2007 the Betri P/F owned company, Betri Trygging P/F, established a new pension and life insurance company named Betri Pensjón Ltd.

#### *Deposit Guarantee Fund*

As of 1 October 2010, the Deposit Guarantee Fund guarantees for ordinary deposits registered in the name of a depositor with an amount corresponding to a net value of up to EUR 100,000.

As all Faroese banks have a general obligation to contribute to the Deposit Guarantee Fund, any case of payments under the guarantee towards depositors and investor or winding-up of distressed banks in the Kingdom of Denmark (including the Faroe Islands and Greenland) by the Financial Stability Company will affect the Faroese banks and their payment obligations towards the Deposit Guarantee Fund.

In October 2013 an agreement was reached in the Danish Parliament about the framework for the regulation of Danish SIFIs, (Systemically Important Financial Institutions).

In February 2014, the Faroese Government and the Danish Government agreed that three Faroese banks, Bank Nordic, Betri Banki and Norðoya Sparikassi should be considered as SIFI banks. However, from 1 January 2021 an extra criterium in addition to the existing ones was implemented, stating that the balance of a bank must exceed DKK 3 billion in order to be appointed as a SIFI bank in the Faroe Islands. Thus, from June 2021 Norðoya Sparikassi was no longer a SIFI bank.

#### **Currency**

The currency of the Faroe Islands is the Faroese króna, issued by the Danish Central Bank, Danmarks Nationalbank. The Danish Central Bank considers the Faroese króna to be a special version of the Danish krone and unique. Faroese bank notes are in circulation in the Faroe Islands. The basis of the Faroese króna is an equal amount of Danish kroner deposited in an account in the Danish Central Bank. Although the bank notes used in the Faroe Islands are Faroese, the coins are the same as those in

circulation in the rest of the Kingdom of Denmark. Faroese and Danish bank notes are fungible in the Faroe Islands. The Danish Central Bank is the lender of last resort and all local Faroese accounts are denominated in Danish kroner.

### 3.5 Description of the Issuer's political system and government

The Faroe Islands are a self-governing country within the Kingdom of Denmark which also comprises Greenland.

The Faroe Islands legislate and govern a wide range of areas in accordance with the Faroe Islands Home Rule Act no. 137 of 23 March 1948 (the "Home Rule Act"). These include the conservation and management of living marine resources within the 200-mile fisheries zone, sub-surface resources, trade, fiscal, industrial and environmental policies, transport, communication, culture, education and research.

According to the Home Rule Act some matters are to remain the responsibility of the Danish Government as long as the Faroe Islands are part of the Kingdom of Denmark. Examples are citizenship, high court, foreign policy and defence policy.

Other matters (referred to as "joint matters") are administered by the Danish Government according to Danish law but will be transferred to the Government of the Faroe Islands if and when the Faroese Parliament decides so. Examples of such joint matters are the judicial system, the police force and banking supervision.

Finally, some matters are administered by the Government of the Faroe Islands according to Faroese law. These are referred to as "special matters". Examples hereof are health services, social services, social security, public transport, finance and economy, industry and tax law.

The Faroe Islands are not a member of the European Union.

The Faroese Parliament (Løgting) is the legislative assembly for Faroese affairs. The Faroes Parliament also appoints the Prime Minister (Løgmaður), who along with his/her cabinet ministers constitute the Government of the Faroe Islands (Føroya Landsstýri).

The Løgting has 33 members. The Faroese people also elect two representatives to the Danish Parliament.

The Faroese head of state is the Danish head of state, Queen Margrethe II.

#### ***Head of the Government of the Faroe Islands***

The Prime Minister since 16 September 2019 is Bárður á Steig Nielsen (The Unionist Party).

#### ***Present government***

The Government of the Faroe Islands (Føroya Landsstýri) consists of at least two Cabinet Ministers led by the Prime Minister. After the election on 31 August 2019 the Government of the Faroe Islands coalition was on the 16 September 2019 made up of representatives from the Unionist Party (Sambandsflokkurin), the Peoples Party (Fólkaflokkurin) and the Center Party (Miðflokkurin).

## 4. Public finance and trade

### 4.1 The tax and budgetary systems

#### Income taxes

Income tax levied by the Customs and Tax Administration is calculated on a sliding scale.

A gross tax system was introduced in 1997. This means that instead of providing for tax deductions, specific subsidies are allowed to compensate for certain expenses. There is no central governmental income tax on incomes from DKK 0 to DKK 65,000. Income from DKK 65,000 to DKK 235,000 is taxed with 15%, from DKK 235,000 to 330,000 with 20%, from DKK 330,000 to DKK 800,000 is taxed with 25%, and income over DKK 800,000 is taxed with 30%.

Municipal taxes are assessed using the same calculation of income as that of the Customs and Tax Administration, except that a flat tax rate is applied. There is no municipal income tax on incomes under DKK 30,000. Income over DKK 30,000 is taxed by a flat rate. All except three small municipalities have tax rates between 18.5% and 22.0%, and the average municipal tax rate is 20.19%.

Members of the National Church also pay church tax, which is between 0.6 and 0.9 in all municipalities.

Labour market contributions are 3.0% to the Labour Market Pension Fund (LMPF). A larger part of pension expenditures is now paid by the LMPF, and a smaller part of pension expenditures is paid over the governmental budget. The allocation is 1% to the unemployment fund and 0.96% to the maternity leave fund. The municipal tax and church tax together with the labour market contributions total approximately 25%. The marginal tax rate is therefore approx. 40% for lower incomes from DKK 65,000 to DKK 235,000 gradually increasing up to approx. 55% for incomes above DKK 800,000.

#### Corporate taxes

All corporations in business must render accounts and are allowed to deduct for expenses.

Corporate taxes are 18%. Of the tax amounts, 70% is paid to the Faroese Treasury, and the remaining 30% to the local municipal authorities.

The tax rate for companies in the oil industry is 27% which is all paid to the Faroese Treasury.

Corporations that are not liable to collect VAT pay a payroll tax based on total wages and salaries pay – financial services companies pay respectively 12%, insurance companies pay 10% and private sector health services pay 2.5%.

Shipping firms with ships registered in the Faroese International Ship Register (FAS) will receive a 35% refund of wages and other payments made to persons liable to pay taxes in the Faroe Islands.

## Payment for fishing licences and fish farming licences

Since 2011 the fishing fleet has paid for fishing rights for mackerel, and since 2016 the Faroese Parliament has imposed a payment per kg of mackerel, herring and blue whiting being caught. The payments provided the Faroese Treasury a revenue of DKK 242 million in 2021. Since 2017 part of the mackerel, herring, blue whiting and the Barents Sea cod quotas have been sold on auctions. The government received DKK 72 million in revenues in 2021 from these auctions.

With effect from 2020, the payments for fishery licences have changed. No new auctions will be held. However, the payment for fishing rights in 2022 is estimated to be DKK 60 million for auctions previously held, and the payment for mackerel, herring, blue whiting and cod in the Barents Sea is estimate to give a revenue of DKK 252 million. The total payments for fishing rights in 2022 will therefore be DKK 312 million, which is approximately the same as the payments for 2018 and 2021.

From 2016 the fish farming industry pays one industry specific tax. The tax rates were changed in 2019. The tax is calculated on basis of a sliding scale, 0.5% per kilo when the price is below DKK 32, 2.5% per kilo when the price of salmon is between DKK 32 and 36, and 5% per kilo, when the price exceeds DKK 36. The revenues from the tax were DKK 196 million in 2021 and is estimated to be about the same for 2022 in the Budget Act.

## Capital gains tax

Interest on deposits in Faroese banks is not included in the income subject to income tax. Instead, a yearly tax of 35% of the interest is deducted from the interest payment by the financial institutions and transferred to the Treasury. All income from securities (interest, dividends and capital gains) is taxed at 35%. However, this does not include corporations and some foundations, which pay a corporate tax of 18%. There is no property or wealth tax.

## Customs and VAT

The Faroese Customs Act is based on the international World Custom Organisation's (WCO) Harmonised Commodity Description and Coding System (HS Code). Customs duties are based on the GATT rates. Because of the trade agreement from 1992 with the EU, renewed by agreement in January 1997, the fiscal duties levied on imports are replaced by a value-added tax (VAT) (normally 25% of the invoice value) and excise duties on some consumption items.

## The budgetary system

The distribution of government expenditure for different items shows actual financial outlays.

Investments in large assets are financed largely by current provisions and are booked immediately as expenses in the appropriate fiscal year.

In a few cases public limited companies are created to operate and manage public services and large, public construction projects. This has been the case for Faroese Telecom, the Postal Service, and the sub-sea tunnels between Vágur and Streymoy, Eysturoy and Borðoy, and Streymoy and Sandoy, respectively.

Capital expenses in 2021<sup>7</sup> were DKK 508 million of which construction of fixed capital were DKK 437 million. The majority of the investments were allocated to education, health, transport and communication.

Operating expenses in 2021 were DKK 7,934 million, of which compensation of employees was DKK 2,790 million. Transfers and other expenses were DKK 3,249 million and purchases of goods and services were DKK 1,903 million. The governments operating revenues in 2021 were DKK 8,661 million. Income and corporate taxes were DKK 3,063 million, VAT and other indirect taxes were DKK 2,884 million. Transfers from the Danish state were DKK 650 million, revenues from fees and other domestic transfers were DKK 675 million, and Sales of goods and services were DKK 950 million. The government accounts show a surplus of DKK 261 million in 2021. See table 9.

## 4.2 Gross public debt

<sup>7</sup> As of April 1st 2022. The government accounts for 2021 are not final yet

The Government of the Faroe Islands has always repaid debt and has never been in default.

### 4.3 Foreign trade and balance of payments

The main explanation for the improvement of the balance of payments current accounts is that the export has increased from DKK 6.2 billion in 2013 to DKK 108 billion in 2021 (61%), whereas the growth in import has been slower, from DKK 6.3 billion in 2013 to DKK 9.3 billion in 2021 (48%).

#### Balance of payments

### 4.4 Foreign exchange reserves

The Issuer does not hold specific foreign exchange reserves, as the Faroe Islands are part of the Danish currency area. However, according to Faroese Parliament act, the Faroese Government holds a minimum reserve liquidity of 15% of GDP. The minimum reserve liquidity is DKK 3.05 billion in 2022. Parts of the Faroese Government's financial assets are invested in assets held outside the Faroe Islands, as specified in the table below. The assets held outside the Faroe Islands are mainly invested in government bonds and Danish mortgage bonds, but also in shares. The government bonds and Danish mortgage bonds may be used as collateral within limits in an overdraft facility or as collateral in repo agreements. In general, the assets are liquid as securities are used as collateral in credit facility agreements.

As of the 1 January 2017 Landsbanki Føroya is acting as investment manager for the Faroese Government.

1) Government Budget Act as approved by the Faroes Parliament in December 2021.

2) At the beginning of the fiscal year 2022, appropriations transferred from previous years are estimated to DKK 255 million.

3) Net government borrowing in 2020 is DKK 1.6 bn.

## 4.6 Auditing procedures

The annual budget is presented to the Faroese Parliament before October and must be approved before 1 January in the following year. In practice, the approval occurs before Christmas.

All government investments and other expenditures must be approved in the budget for the year in question.

The accounts and bookkeeping of the government exchequer are audited by the National Audit Office. Once audited, the books are passed on to a committee consisting of members selected by the Faroese Parliament. The accounts are finally approved by the Parliament together with the auditing report.

## 5. Significant changes

In the opinion of the Issuer there have been no significant changes to the information in the Registration Document, Section 4 above, since the end of the last fiscal year 2021, ending 31 December 2021.

The decrease in GDP in 2020 2.8% in current prices was due to the outbreak of Covid-19. The Statistics Faroe Islands and the Economic Council estimate a growth in nominal GDP of 3.3% in 2022 and 2.4% in 2023. T The estimates are somewhat uncertain due to the current geopolitical conflict.

The geopolitical conflict related to the war in Ukraine will result in decreased export to Russia, and the adoption of the Law on Restrictive Measures on 5 May 2022 whereby sanctions will be imposed against Russia may result in the termination of the trade agreement with Russia. The Faroese exporting companies are expected to establish new markets relatively fast with a short temporary fall in prices as the foreign demand for fish is stable. The affects from the geopolitical conflict on the Faroese economy are expected to be relatively small and are currently expected to mostly take place in 2022 and to a lesser extent in 2023.

The Ministry of Finance expects the private and public investments to remain at a high level for the next two years albeit the resent prices increasements might affect the private consumption negatively in the next couple of years if the higher level of inflation becomes permanent.

## 6. Legal and arbitration proceedings

The Government of the Faroe Islands has not for the past year been involved in any governmental, legal or arbitration proceedings (including any such proceedings which are pending or threatened of which the issuer is aware) which have had or may have a significant impact on the financial position of the Issuer.

The Government of the Faroe Islands has no immunity from legal proceedings in relation to the Notes.

# 7. Statements by experts and declaration of any interest

The Faroe Islands hold a foreign currency rating of Aa2 assigned by Moody’s Investors Service.

<b>Ratings Category</b>	<b>Moody's Rating</b>
Outlook	Stable
Government Bonds - Foreign Currency	Aa2
Government Bonds - Domestic Currency	Not rated

On 5 August 2021, Moody’s affirmed the long-term issuer rating of the Government of the Faroe Islands to Aa2 with stable outlook.

The Aa2 foreign currency rating with stable outlook for the Faroe Islands reflects a number of factors including its fiscal autonomy and revenue and expense flexibility with a track record of prudent budgeting, stable relationship with Denmark (Aaa, Stable) and a strong liquidity buffer, which mitigate the refinancing risk associated with the reliance on short term borrowing. The rating also takes into account the Faroese economy’s dependence on the fishing sector, which is somewhat offset by regular fish stock control and a push to diversify the trade partners.

Further and more detailed information about the credit rating of the Faroe Islands can be obtained on the website of the Faroese Governmental Bank:  
<https://www.landsbankin.fo/en-gb/liquidity-and-debt/debt/rating-reports>

## 1. Risk factors

Prospective investors should read this Prospectus carefully. The Prospectus consists of three documents: Summary, Registration Document and this Securities Note all of which have been dated 1 June 2022. Investing in the Notes involves certain risks, which the prospective investors should take into consideration prior to deciding to make an investment in the Notes.

This Securities Note which forms part of the Prospectus has been reviewed and approved by the Financial Supervisory Authority of the Central Bank of Iceland ("FSA") as competent authority under Regulation EU 2017/1129 (the "Prospectus Regulation") which has been implemented into Icelandic law with Act No. 14/2020 (the "Act on Prospectus for Public Offering or Admission to Trading on a Regulated Market"). The FSA only approves this Securities Note as meeting the standards of completeness, comprehensibility and consistency imposed by the Prospectus Regulation. Approval by the FSA should not be considered as an endorsement of the Issuer or of the quality of the Notes that is the subject of the Prospectus. Investors should make their own assessment as to the suitability of investing in the Notes.

The Issuer believes that the factors described below represent the principal risks inherent in investing in the Notes, but the inability of the Issuer to pay interest, principal or other amounts on or in connection with the Notes may occur for other reasons which may not be considered significant risks by the Issuer based on information currently available to it or which it may not currently be able to anticipate.

Taking into account the negative impact on the Issuer and the probability of their occurrence, the risk factors as set out below have been, in the assessment of the Issuer, been ordered so that the most material risks are set out first.

The Issuer believes that the factors described are material for the purpose of assessing the market risk associated with the Notes being offered and admitted to trading.

Most of these factors are contingencies which may or may not occur and the Issuer is not in a position to express a view on the likelihood of any such contingency occurring.

There may be other risks that a prospective investor should consider that are relevant to the investor's own particular circumstances or generally.

Prospective investors should carefully consider, among other things, the factors described in the sections below before purchasing the Notes. In addition, for risk specifically associated with the Issuer, prospective investors are advised to consider the section "Risk factors" in the Registration Document.

### 1.1 Market risk

The market of the Notes issued by the Government of the Faroe Islands is influenced by economic and market conditions and, to varying degrees, interest rates, currency exchange rates and inflation rates. There can be no assurance that events on the Faroe Islands, in Denmark, Europe or elsewhere will not cause market volatility and that such market volatility will not adversely affect the trading price of the Notes.

## 1.2 Secondary market risk

The Notes may have no established trading market when issued, and one may never develop. If a market does develop, it may not be liquid. Therefore, investors may not be able to sell their Notes easily or at prices that will provide them with a yield comparable to similar investments that have a developed secondary market.

## 1.3 The Notes may not be a suitable investment for all investors

Each potential investor in the Notes must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the Notes, the merits and risks of investing in the Notes and the information contained or incorporated by reference in this Prospectus or any applicable supplement to this Prospectus;
- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Notes and the impact such investment will have on its overall investment portfolio;
- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the Notes, including where the currency for principal or interest payments, i.e. DKK, is different from the currency in which such potential investor's financial activities are principally denominated;
- (iv) understand thoroughly the terms of the Notes and be familiar with the behaviour of any relevant indices and financial markets; and
- (v) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

## 1.4 Liquidity risk

There can be no assurance that an active trading market for the Notes will be developed and maintained, which may affect the trading price and the liquidity of the Notes. During the period between the issuance and repayment, the market value of the Notes will be determined through the ordinary trading on the main market of Nasdaq Iceland hf. and on the main market of Nasdaq Copenhagen A/S. The Issuer has not made any arrangement with any persons or companies to ensure the liquidity of the Notes and that the quotation follows the market price of the Notes. The Issuer has no obligation to buy back the Notes. However, without any commitment to do so, Nordea Bank AB (publ) will aim to maintain a market for the Notes by quoting purchase and sales prices on an on-going basis.

## 1.5 Legal risk

The terms and conditions of the Notes are based on Danish law in effect on the date of this Prospectus. No assurance can be given that as to the impact of any possible judicial decisions or changes to Danish and Faroese law after the date of this Prospectus.

The investment activities of certain investors are subject to legal investments law and regulations. The investor should consult legal advisers to determine whether and to what extent the Notes are a legal investment to the investor or if any restrictions apply to the purchase of the Notes by the investor.

## 1.6 Limitations to the liability of the Issuer

The Issuer shall not be liable for any loss incurred by the noteholders as a consequence of statutory provisions, measures adopted by any governmental or other authority actual or imminent war, insurrections, civil commotion, terrorism, sabotage or Acts of God. Nor shall the Issuer be liable for any loss caused by strikes, lockouts, boycotts or blockades, whether or not the Issuer itself is a party to the dispute, and notwithstanding that the dispute may affect only part of the functions of the Issuer. Nor shall the Issuer be liable for any loss arising from any overdue payment caused by the above events.

## 1.7 Credit risk

The Government of the Faroe Islands' liability to make payments according to the terms and conditions in this Prospectus constitutes direct and unsecured obligations of the Government of the Faroe Islands and constitutes unsubordinated loan indebtedness ranking *pari passu* with all other loan indebtedness of the Government of the Faroe Islands. The Notes of each series will rank equally with each other, without any preference among themselves.

There can be no assurance that the credit rating of the Government of the Faroe Islands will not change, which may affect the trading price of the Notes.

## 1.8 Withholding tax

The Issuer does not accept any liability for tax withheld or for collection of withholding tax irrespective of where the Notes are registered. If the Issuer is obliged to withhold tax or collect withholding tax pursuant to rules introduced after the Notes have been issued, the Issuer will do so, and the Issuer will not be obliged to pay any additional amounts to the Noteholders nor will the Issuer accept liability for any deduction in the amount disbursed to Noteholders.

## 2. Persons responsible

### 2.1 Statement from the Issuer

We, on behalf of the Government of the Faroe Islands, declare, as those responsible for the Prospectus that, having taken all reasonable care to ensure that such is the case, the information contained in the Prospectus is, to the best of our knowledge, in accordance with the facts and contains no omission likely to affect its import.

Tórshavn, 1 June 2022

### 3. Key information

#### 3.1 Interest of natural and legal persons involved in the issue

Issuer:

The Government of the Faroe Islands, which is the executive within the framework of the Faroe Islands Home Rule Act no. 137 of 23 March 1948.

The Government of the Faroe Islands is represented by the Ministry of Finance:

Ministry of Finance  
Fíggjarmálaráðið  
Tinganes  
PO Box 2039  
FO-110 Tórshavn, Faroe Islands  
Tel: +298 352020  
Fax: +298 352025  
E-mail: fmr@fmr.fo

Arranger :

Nordea Bank Abp, Finland  
Satamaradankatu 5  
Helsinki  
FI-00020 Nordea

Account Holding Institute:

Nordea Danmark, Filial af Nordea Bank Abp, Finland  
Grønjordsvej 10  
DK-2300 Copenhagen S, Denmark

To the best knowledge of the Issuer, Arranger and Account Holding Institute, there are no interests, including conflicting ones, that are material to the issue of the Notes.

Neither the Arranger nor the Account Holding Institute takes responsibility for the creditworthiness of the Issuer.

#### 3.2 Reasons for the issue and use of proceeds

The proceeds from the issue of the Notes will be used as follows:

The proceeds from the issue of the Notes will be used for the financing of the redemption of Føroya Landsstýri DKK 1,300,000,000 0.00% due 2 June 2022 with ISIN code DK00304669900.

The aggregate net proceeds to the Issuer from the issue of the Notes, after deduction of the fees and expenses payable by the Issuer, will be approximately DKK 1,097,712,000.

The Issuer will bear the costs directly related to the issuance of the Notes. The total costs are expected to amount to approx. DKK 2,362,295 including placing commission and arranging fees.

The costs incurred at Nasdaq Iceland hf. in relation to the admission for trading and official listing on the main market of Nasdaq Iceland hf. will be paid by the Issuer. The fee for admission to trading will be ISK 485,000 plus annual expenses for the admission to trading and official listing of the Notes which will be a fixed fee of ISK 58,000 per plus a variable fee of 0.00028% of the market value of the Notes.

Costs incurred at Nasdaq Copenhagen A/S in relation to the admission for trading and official listing on the main market of Nasdaq Copenhagen A/S will be paid by the Issuer. The annual expenses for the admission to trading and listing of the Notes will be approx. DKK 18,800.

Costs incurred at Euronext Securities (as defined below in clause 4.3) and to the Account Holding Institute in relation to the registration of the Notes in the system of Euronext Securities will be paid by the Issuer. The total costs related to registration of the Notes and fees to Euronext Securities and the Account Holding Institute are approx. DKK 73,900.

Costs incurred at The Financial Supervisory Authority of the Central Bank of Iceland ("FSA") in relation to the vetting and approval of the Prospectus will be paid by the Issuer. The total costs to the FSA are ISK 350,000 corresponding to approx. DKK 18,900.

## 4. Information concerning the Notes

The Notes will be issued in uncertificated and dematerialised book entry form and settled through Euronext Securities (VP Securities A/S), Nicolai Eigtveds Gade 8, DK-1402 Copenhagen K, Denmark ("Euronext Securities"), on the Issue Date. The Notes cannot be registered in the name of the holder.

Nordea Danmark, Filial af Nordea Bank Abp, Finland, Grønjordsvej 10, DK-2300 Copenhagen S, Denmark, is acting as Account Holding Institute ("Kontoførende Institut") in relation to VP SECURITIES A/S.

The Notes will be controlled by Nordea Danmark, Filial af Nordea Bank Abp, Finland as Account Holding Institute for and on behalf of Euronext Securities and the noteholders in accordance with the provisions of the Danish Capital Markets Act (Consolidated Act No. 931 of 6 September 2019, as amended) and Consolidated Act no. 1175 of 31 October 2017 regarding registration of fund assets in a securities centre. For the avoidance of doubt, notes registered with Euronext Securities are negotiable instruments not subject

to any restrictions on the free negotiability within the Kingdom of Denmark, under Danish Law.

#### 4.4 Currency of the Notes

The currency of the Notes is Danish kroner ("DKK") and each note will be issued with the denomination of DKK 1,000.

#### 4.5 Status of the Notes

The Notes constitute direct and unsecured obligations of the Government of the Faroe Islands and constitute unsubordinated loan indebtedness ranking *pari passu* with all other loan indebtedness of the Government of the Faroe Islands, The Notes of each series will rank equally with each other, without any preference among themselves.

#### 4.6 Rights etc.

##### 4.6.1 Redemption by the Issuer

The Notes are not redeemable by the Issuer prior to the Maturity Date.

##### 4.6.2 Redemption by noteholders

With the exception of the events described under Event of Default below, the noteholders may not demand redemption of the Notes prior to the Maturity Date.

##### 4.6.3 Events of Default

Any noteholder may give written notice to the Issuer that such note is, and such note shall accordingly immediately become, due and payable at its principal amount together with interest accrued to the date of repayment:

- a) if the Issuer fails to perform or observe any of its other obligations under the Notes and such failure is incapable of remedy, or if such failure can be remedied and such failure continues for the period of 30 days next following the service by any noteholder on the Issuer of notice requiring the same to be remedied;
- b) if the Issuer's debt in connection with borrowed funds for a minimum amount of DKK 75,000,000 or equivalent in another currency or currency unit either (i) falls due for payment prior to the repayment day because of default, or (ii) is not paid on the due date (or following the period of remedy provided for by law or following an agreement to that effect in the relevant claim between the parties);  
or
- c) if the Issuer's possibilities of fulfilling its obligations under the Notes deteriorate significantly, for example because of the Faroe Islands' secession from its union with Denmark.

Payment shall be effected via the accounts registered with Euronext Securities.

##### 4.6.4 Buyback

The Issuer reserves the right to buy back the Notes from time to time in the open market or otherwise. The Issuer may choose to cancel or keep/resell Notes bought back.

#### 4.6.5 Notices

All notices to noteholders concerning the Notes are made public and can be viewed on the websites of Nasdaq Iceland hf. and Nasdaq Copenhagen A/S ([www.nasdaqomxnordic.com/news](http://www.nasdaqomxnordic.com/news)) and/or send to noteholders through Euronext Securities.

Any notices to the Issuer to be given in accordance with these terms and conditions of the Notes can validly be given to the Ministry of Finance, Kvíggjartún 1, PO Box 2039, FO-165 Argir, Faroe Islands or such other address as has been notified to the noteholders registered in compliance with the first sentence of this term.

#### 4.6.6 Force majeure

The Issuer shall not be liable for any loss incurred by the noteholders as a consequence of statutory provisions, measures adopted by any governmental or other authority actual or imminent war, insurrections, civil commotion, terrorism, sabotage or Acts of God. Nor shall the Issuer be liable for any loss caused by strikes, lockouts, boycotts or blockades, whether or not the Issuer itself is a party to the dispute, and notwithstanding that the dispute may affect only part of the functions of the Issuer. Nor shall the Issuer be liable for any loss arising from any overdue payment caused by the above events.

#### 4.6.7 Charging

As long as any of the Notes are outstanding, the Issuer will not provide security for any debt in connection with payment obligations relating to loans existing on or after the date of issue of the Notes, whether in the form of a mortgage, pledge or other security in any of the issuer's present or future assets or income, unless the Notes are secured equally and proportionately by the provision of such security. However, a mortgage, pledge or other security in the Issuer's properties or assets may be provided as collateral for the entire purchase price or parts thereof for such properties or assets, including interest accrued. "Loan" means a loan raised through the issue of instruments of debt which are or are capable of being traded in the ordinary markets.

### 4.7 Interest

The Notes bear interest from and including 2 June 2022 to but excluding the 2 June 2024.

The Notes will pay an interest of 1.25 per cent per annum payable annually in arrears in each year commencing on 2 June 2023 and ending on 2 June 2024. The first interest period shall be determined as the period from and including the Issue Date to (but excluding) the first Interest Payment Date; and with respect to the subsequent interest periods, the period commencing on an Interest Payment Date (included) to the next Interest Payment Date (excluded) (each an "Interest Period").

If an Interest Payment Date would otherwise fall on a day which is not a business day in Denmark, meaning a day other than a Saturday, Sunday or public holiday on which commercial banks are open for business in Denmark (each a "Business Day"), payment of interest shall be postponed to the following Business Day (following business day convention). The Interest Period shall not be adjusted if the Interest Payment Date is postponed to the following Business Day (unadjusted).

#### 4.7.1 Interest Amount

The interest amount payable per Note on the Interest Payment Date (the "Interest Amount per Note") shall be determined by multiplying the Interest Rate with the Principal Amount per Note.

Where the Interest Amount per Note is to be calculated for a period shorter than a year, the Interest Amount per Note shall be calculated by multiplying the Interest Rate with the Principal Amount per Note, the product of which is multiplied with the actual number of days elapsed in the relevant Interest Period and divided by the actual number of days in the relevant year (ACT/ACT day count fraction).

#### 4.7.2 Interest Payments

Payments of interest in respect of the Notes will be made, in accordance with and subject to the rules and regulations governing Euronext Securities from time to time, to the noteholders through the Account Holding Institute by credit to the accounts with banks designated to Euronext Securities.

#### 4.7.3 Accrued Interest

The Notes shall be traded with accrued interest. The accrued interest per Note shall be calculated by multiplying the Interest Rate with the Principal Amount per Note, the product of which is multiplied with the actual number of days elapsed in the relevant Interest Period and divided by the actual number of days in the relevant year (ACT/ACT day count fraction).

#### 4.7.4 Prescription

Claims for payment of interest will become void three (3) years and claims for payment of principal, ten (10) years after the due date, see section 73 of the Danish Securities Trading etc. Act.

### 4.8 Maturity and repayment

The Notes mature on 2 June 2024 (the "Maturity Date") unless the Notes have been redeemed prior to that day due to Events of Default according to Section 4.6.

Repayment of the Notes will be made at the Principal Amount, in accordance with and subject to the rules and regulations governing Euronext Securities from time to time, to the noteholders through the Account Holding Institute by credit to the accounts with banks designated to Euronext Securities.

### 4.9 Yield

The yield on the Notes is xx per cent. per annum. The yield is calculated as of the Issue Date on the basis of the Issue Price being 1.254 per cent. The yield is not an indication of future yield.

### 4.10 Representation of noteholders

There is no representation of the noteholders.

#### 4.11 Authorisation

The Notes will be issued on Issue Date in accordance with authorisation given by the Faroese Minister of Finance on 17 May 2022.

#### 4.12 Issue Date

The Notes will be issued on 2 June 2022 (the "Issue Date").

#### 4.13 Transferability

The transferability of the Notes shall not be subject to any restrictions. However, for noteholders subject to other jurisdictions than Denmark, reservations are made as to the legislation of such jurisdictions. Subject to the limitations contained in the Danish Securities Trading etc. Act. the Notes shall be considered negotiable instruments issued in dematerialised form.

#### 4.14 Taxation

The tax legislation of the Faroe Islands and/or the jurisdiction where the investor is resident may have an impact on the income received from the Notes. All investors are advised to consider any potential taxation issues that may concern their purchase or sale of the Notes and to seek independent advice in this respect.

The Issuer does not accept any liability for tax withheld or for collection of withholding tax irrespective of where the Notes are registered. If the Issuer is obliged to withhold tax or collect withholding tax pursuant to rules introduced after the Notes have been issued, the issuer will do so, and the Issuer will not be obliged to pay any additional amounts to the Noteholders nor will the Issuer accept liability for any deduction in the amount disbursed to Noteholders.

##### 4.14.1 Investors located in the Faroe Islands

Resident individuals in the Faroe Islands are subject to 35% tax on capital gains payment.

Resident corporations in the Faroe Islands are subject to 18% tax on capital gains payments.

For resident individuals in the Faroe Islands, payments of interest of the Notes and capital gains and losses in connection with the sale or redemption of the Notes are taxed as capital income. Net capital losses can be deducted in future capital gains in up to five following years. In respect of resident corporations in the Faroe Islands, payments of interest on the Notes and capital gains and losses in connection with the sale or redemption of the Notes are included in the calculation of corporate tax.

According to current legislation all payments of interest on the Notes will be made without withholding or deduction tax (coupon tax) on the Faeroe Islands. In the event that withholding or deduction tax is required by law on the Faeroe Islands, the Government of the Faroe Islands will withhold such tax before paying interest to the noteholders registered. In such case, the Issuer will not compensate the noteholders. Any interest due for payment as well as possession, repayment and transfer of the Notes will be reported by the relevant custodian bank to the Danish tax authorities in accordance with the applicable tax rules.

#### 4.14.2 Investors located in Denmark and Iceland

Subject to tax treaties entered into by the Faroe Islands with Iceland and Denmark, respectively, all payments of interest on the Notes will be made without withholding or deduction for tax (coupon tax) on the Faeroe Islands. In the event that withholding or deduction for tax is required by law on the Faroe Islands, the Government of the Faroe Islands will withhold such tax before paying interest to the noteholders registered. In such case, the Issuer will not compensate the noteholders.

For resident individuals in Denmark, payments of interest on the Notes are included in the calculation of capital income. Capital gains and losses in connection with the sale or redemption of the Notes, will be also included in the capital income, but only if the net gains on investments in (1) the Notes and other debt obligations, (2) debt in foreign currencies or (3) non-accumulating bond investment funds; exceeds DKK 2,000. In respect of resident corporations in Denmark, payments of interest on the Notes and capital gains and losses on the Notes are included in the calculation of corporate tax. Gains and losses are calculated according to a mark-to-market principle and taxed on an accrual basis.

For resident individuals in Iceland, payments of interest of the Notes and capital gains and losses in connection with the sale or redemption of the Notes are taxed as capital income. Net capital losses can be deducted in future capital gains in up to five following years. In respect of resident corporations in Iceland, payments of interest on the Notes and capital gains and losses in connection with the sale or redemption of the Notes are included in the calculation of corporate tax.

Acceptance of the Notes for the trading and official listing on the main market of Nasdaq Copenhagen A/S is expected to have effect from 3 June 2022.

## 7. Additional information

### 7.1 Audit of information

The Issuer's auditors have not audited the information contained in this Prospectus, other than the figures for the central government accounts from 2018 to 2020 specified in the Registration Document, Table 8 (page 22), which have been audited by the National Audit Office and approved by The Faroese Parliament.

### 7.2 Rating

The Notes have not specifically been rated by a rating agency.

The Government of the Faroe Islands holds a foreign currency rating of Aa2 assigned by Moody's Investors Service,

<b>Ratings Category</b>	<b>Moody's Rating</b>
Outlook	Stable
Government Bonds - Foreign Currency	Aa2
Government Bonds - Domestic Currency	Not rated

On 5 August 2021, Moody's affirmed the Aa2 long-term issuer rating of the Government of the Faroe Islands with a stable outlook.

The Aa2 foreign currency rating with stable outlook for the Faroe Islands reflects a number of factors including its fiscal autonomy and revenue and expense flexibility with a track record of prudent budgeting, stable relationship with Denmark (Aaa, Stable) and a strong liquidity buffer, which mitigate the refinancing risk associated with the reliance on short term borrowing. The rating also takes into account the Faroese economy's dependence on the fishing sector, which is somewhat offset by regular fish stock control and a push to diversify the trade partners.

Further and more detailed information about the credit rating of the Faroe Islands can be obtained from: <https://landsbankin.fo/en-gb/liquidity-and-debt/debt/rating-reports>
